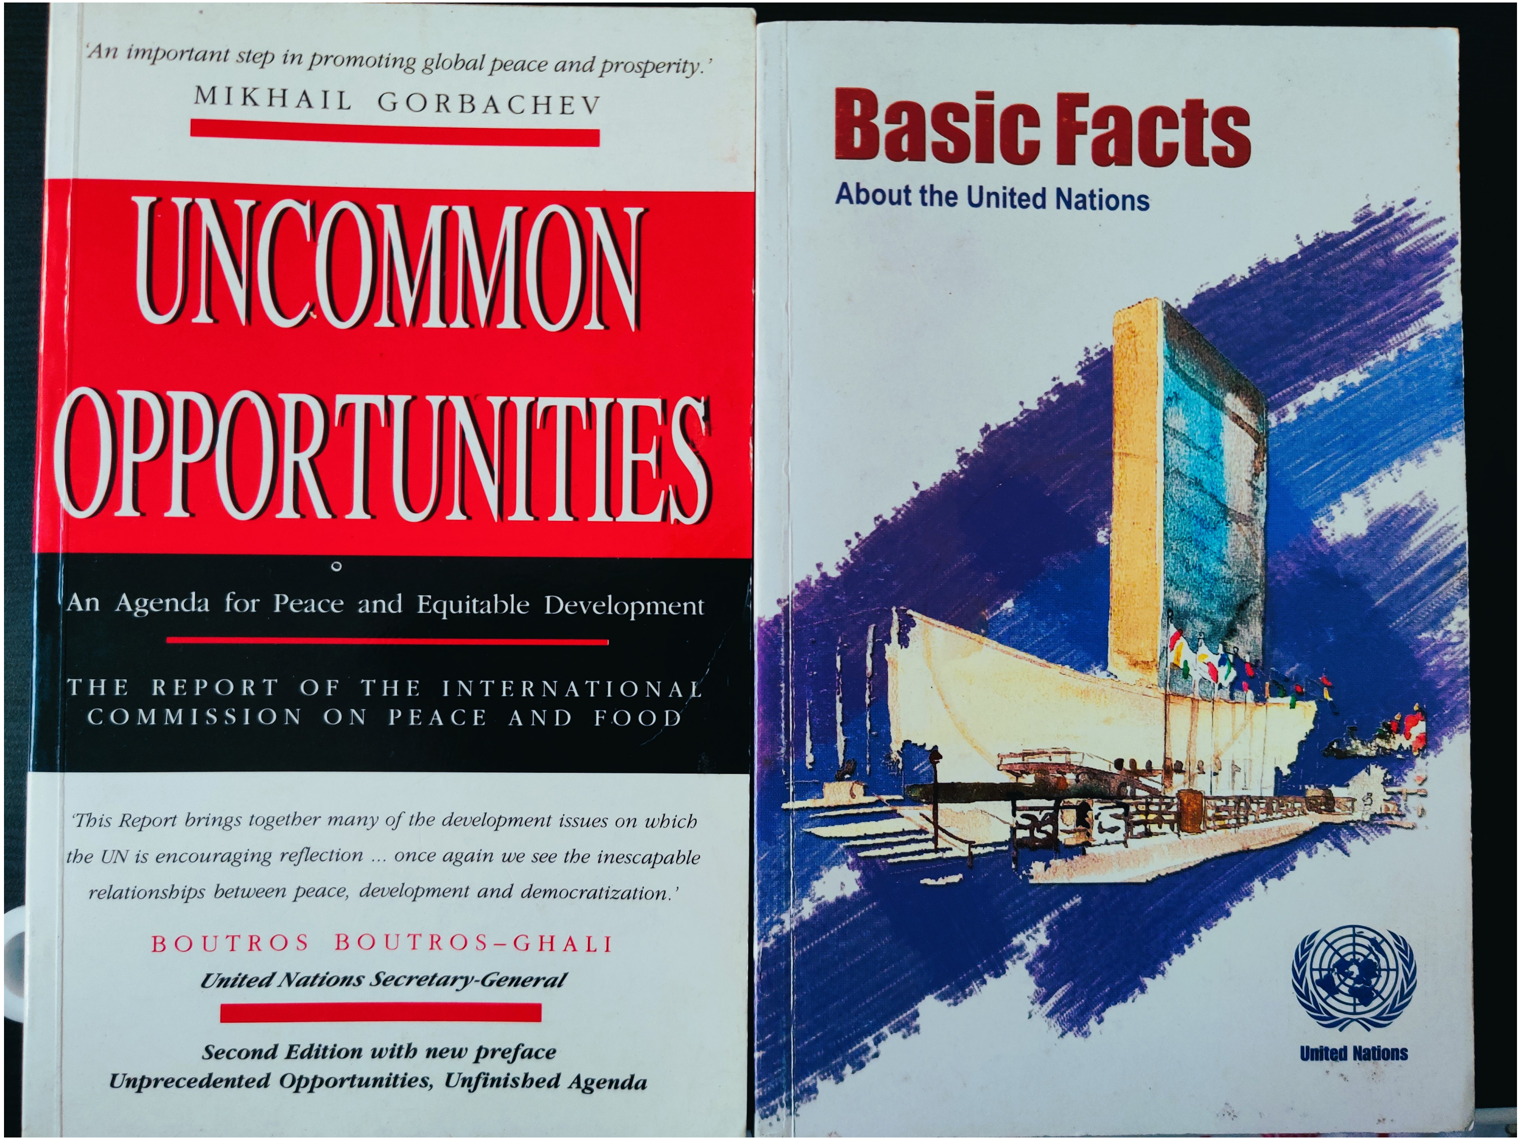
Hi Danish,

2 book suggestions.

Cyber Quantum AI is all fast great and sometimes significantly recondite . But understanding the Historical linear perspectives and timelines facilitates the adoption of rationalist approach. So 2 mini encyclopaedias of World Events at the Macro level will shine some light on the evolution of ICT's , Cooperative Security , use of SPACE for peaceful purposes and Peace building measures of UNITED NATIONS , US , EU , NATO , INDIA and other Major Asian Powers. Acts as a Quick Reference Guide in most cases.

By News & Media Division UN Dept of Public Information New York and International Center for Peace & Development USA , M.S. Swaminathan Research Foundation India.

Catalogue record for the Book is available at the British Library .US CIP data is available from the library of Congress.



'An important step in promoting global peace and prosperity.'
MIKHAIL GORBACHEV
UNCOMMON OPPORTUNITIES
An Agenda for Peace and Equitable Development
THE REPORT OF THE INTERNATIONAL COMMISSION ON PEACE AND FOOD
'This Report brings together many of the development issues on which the UN is encouraging reflection ... once again we see the inescapable relationships between peace, development and democratization.'

Hi Danish,

The white house has recently released an executive order (EO) on improving the nation's cybersecurity. The EO describes the various agencies and infrastructures deemed critical for the nation.-The interesting part is that "Critical Infrastructure" does not refer only to power plants, water facilities, and military systems, it also refers to many digital systems on which nations rely on.

In our fourth CyberSecurity session **"Supply chain attacks & Critical infrastructure: CISA's approach to resiliency"**, we will share everything you need to know about:

- Critical infrastructure and supply chain attacks
- CISA's mission and cybersecurity advisor program
- Scoping cyber security assessments – from strategic to technical
- DHS's "Misconceptions Vs Reality" for securing infrastructures

Join Ron Ford, Cyber Security Advisor at CISA/DHS (Cybersecurity and Infrastructure Security Agency / Department of Homeland Security) and Etay Maor, Sr. Director Security Strategy at Cato Networks as they discuss these topics in the "Supply chain attacks & critical infrastructure: CISA's approach to resiliency" masterclass. **LIVE on August 4th.**

Hi Danish,

When Deborah Wheeler, a veteran CISO, transitioned to one of the world's biggest airlines, she was put in charge of securing oil refineries, planes, and a highly heterogenic environment. In this masterclass, we discussed the challenges CISO face today, from securing a remote workforce to ransomware to workforce recruitment.

CCDCOE Locked Shields 2023

⌛ #Lockedshields2023 may be over, but the excitement lives on! As we plan for next year's exercise, we wanted to take a moment to acknowledge our partners who played a crucial role in making Locked Shields 2023 a success. Here goes!

☝ You may have heard that "cyber is very important." Well, financial systems are important too! One of the most critical components that the Blue Teams had to defend, was the financial sector - an integral part of a country's critical infrastructure.

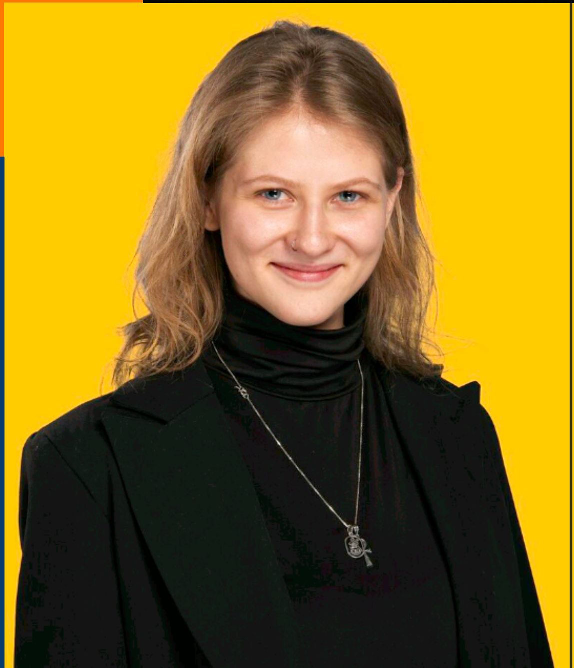
🏦 The financial sector component of the Locked Shields 2023 exercise simulated the reserve management and financial messaging systems of a central bank. From a strategic perspective, the exercise offered training and practice in effective decision-making and crisis coordination when facing large-scale cyber attacks targeting the financial sector and its infrastructure.

The level of sophistication of adversaries targeting the financial sector can range from highly sophisticated state-sponsored adversaries and cyber criminal gangs driven by national or economic interests to hacktivists or individuals driven by political views or ideology. In the context of a hybrid warfare, an objective of a nation-state adversary can be to cause regional or wider economic impact, or instability and distrust among the public in the financial sector of a country.

👏 Thanks to Peter H., Founder & CEO of cybensis GmbH, all of this was included in this year's Locked Shields exercise! We are very pleased that the financial systems are an integral part of the technical exercise since Locked Shields 2022.

"My internship at the Agency has exposed me to a diverse and dynamic professional environment. I have been fortunate to work on valuable and interesting projects."

Kit Gijsbers



"The Agency is a great place to learn about a big and complex organization. The experience here will offer you a wide view on different career perspectives."

Building a Strategic Threat Hunting Program Inbox

Christopher Mitchell, Siemplify Yesterday
to me

Always show pictures from this sender

Hi Danish,

Regardless of the size or maturity of your SOC, with tactical deployment and strategic foresight, teams can develop optimal workflows leading to proactive threat detection, intelligence-driven investigation & response.

Hi Danish,

Security operations is at a critical juncture. Years of digital modernization, adversarial advancement and enduring talent deficits have given rise to an untenable situation.

The good news is the circumstance is not unsolvable. It only requires a rejiggering of familiar ingredients: your people, your processes and your technology — layering on a fresh, open-minded approach, to SecOps.

Hi Danish,

SOAR maximizes security operations efficiency by establishing automated, repeatable workflows. For SOAR to excel, it needs to be flexible enough to synthesize data from a variety of disparate and already installed systems.

Senior SANS Instructor Christopher Crowley explores how Siemplify's leading independent SOAR solution makes analysts more productive, security engineers more effective, and managers more informed about the SOC.

Hi Danish,

SANS released a new report examining how cybersecurity defense teams are evolving to defend against yet-to-be-discovered network threats.

Key findings include; organizations seeing up to a 25% improvement in their security posture from threat hunting, while 51% identify lack of skilled staff and training as the primary barrier to success for threat hunting.

A No Frills Approach to Modernizing Security Operations
WATCH NOW
Siemplify × Atos
Hello Danish,
Building a modern and resilient security operations function is easier said than done, and requires a delicate balance between emerging technologies such as AI and XDR with a tried-and-tested focus on people and process.
This no-nonsense presentation examines the challenges to modernizing security operations and offers practical solutions to address them. Follow Atos CTO for North America, Eric Taylor, as he reveals his company's journey to building a modern and robust security operations function.

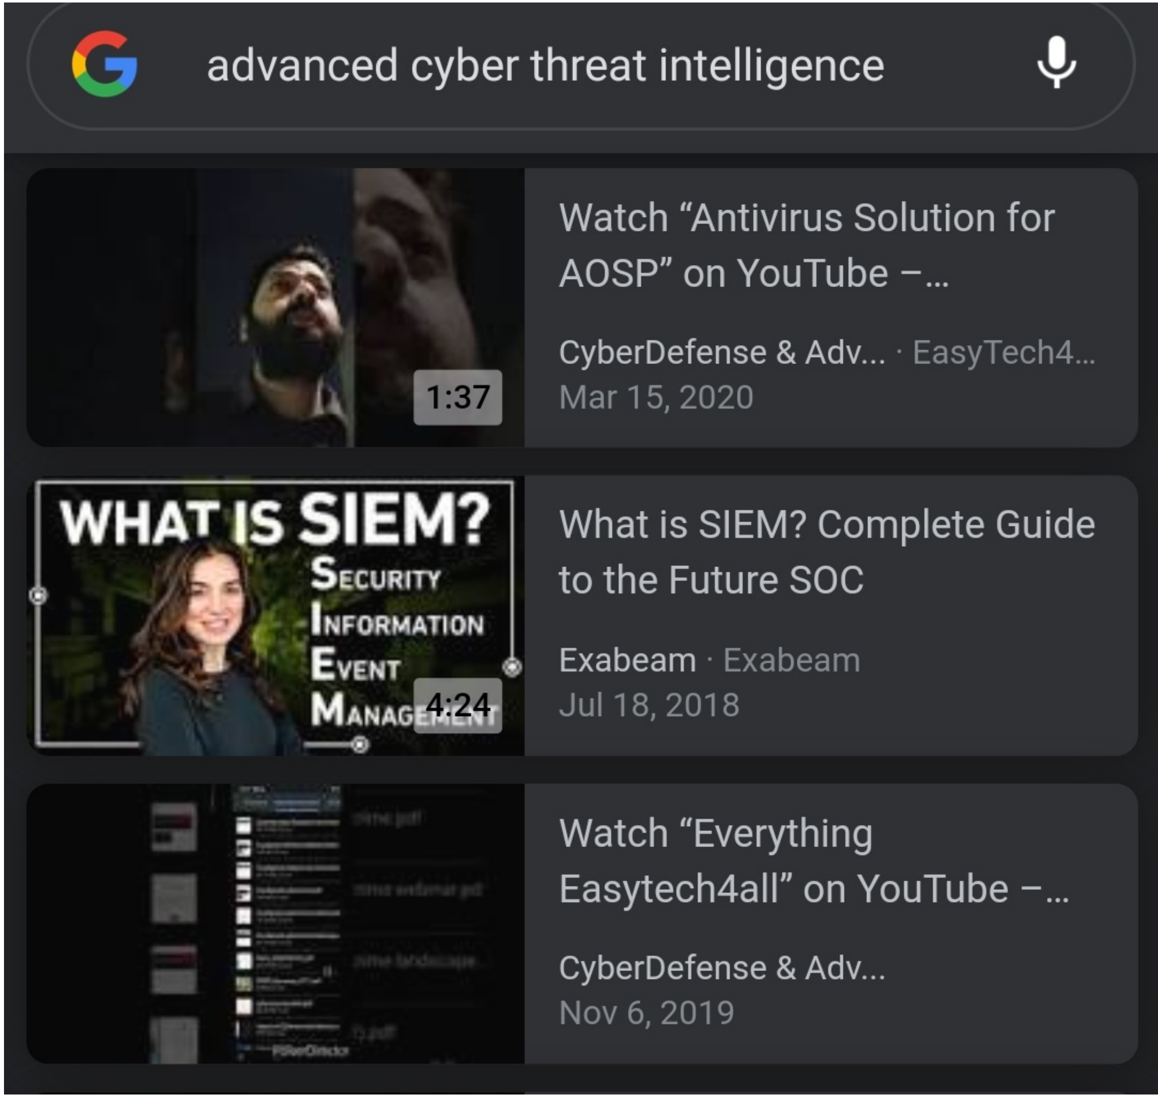
CYBER SECURITY SUMMIT

Security solutions through collaboration.™

The virtual platform will remain open until November 24th!

Hi Danish,

Thank you for participating in the 11th Annual Cyber Security Summit! This year we saw over 1,000 registrants from 43 states and 21 countries! The sessions you registered for will be available for viewing until November 24. Take advantage of the virtual platform and continue exploring the booths, sessions and resources provided.



Enabling Operational Collaboration.

Join intelligence and national security colleagues online on **Wednesday, June 14, from 9:00-9:45 AM ET,** for Coffee & Conversation with **Morgan Adamski, Director, Cybersecurity Collaboration Center, NSA.**

In a moderated conversation with Bishop Garrison INSA VP for Policy, Ms. Adamski will discuss:

- Cyber threat sharing with the DIB
- Working with industry to identify malicious cyber activity
- Convergence of AI and cybersecurity
- NSA's plan to hire 3,000 cyber warriors
- The new National Cybersecurity Strategy

Hear from Morgan Adamski, Chief of NSA's Cybersecurity Collaboration Center at Dec. 9 Program Inbox

DIGITAL SUMMIT FOR:

SASE 2021

APAC

Hi Danish,

Secure access tools can only be effective if the business remains enabled. Users can only be as effective as the access they are granted allows.

Cybersec digital summit 2021

- Examining everything through a risk management lens
- Auditing the end-to-end awareness program and doing more than rolling out the same thing again
- Unpacking desired behaviors and heat maps to gain more insight
- Expediting different yet active learning with nuanced targeted audiences
- Perfecting the art of the nudge
- Discovering the relationship between Secure Access technologies and Secure Access mindsets
- Realizing that Zero Trust technologies only work with Users' Full Trust of the security operation

Forcepoint
Mitigating risks in the work-anywhere world
Hi Danish,
In many ways, 2020 and the pandemic have been a perfect storm for security teams.
For many companies, the shift to widespread remote work was a necessity simply to keep the wheels of business in motion. But this has given rise to a range of new problems and risks — and it's important to tell them apart.

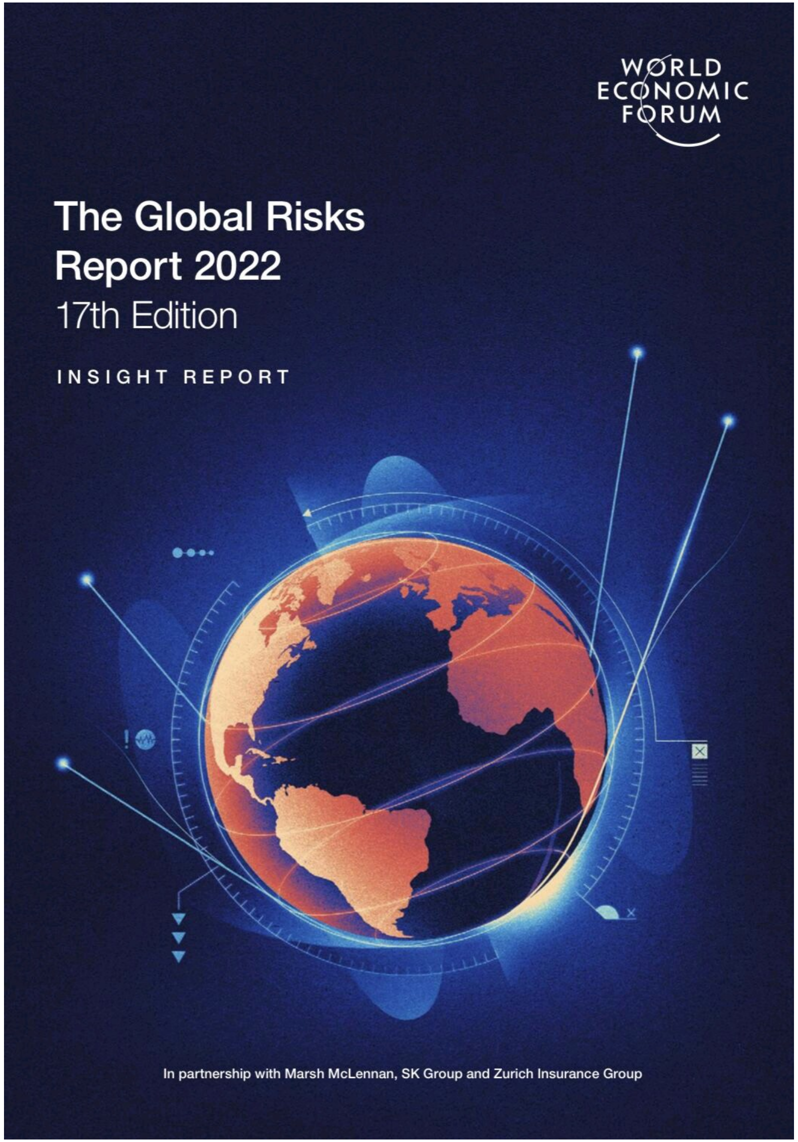
What is Advanced Cyber Threat Intelligence

How Artificial Intelligence Is Shaping the Future of Open Source Intelligence

JANUARY 9, 2019 • THE RECORDED FUTURE TEAM

Editor's Note: The following blog post is a summary of a presentation from RFUN 2018 featuring OSINT subject matter expert Chief Warrant Officer 3 Nathan McKeldin of the U.S. Army.



WORLD ECONOMIC FORUM
The Global Risks Report 2022
17th Edition
INSIGHT REPORT
In partnership with Marsh McLennan, SK Group and Zurich Insurance Group

Prioritizing Cyber Threats
Actors, Target, Goals, Impact
Attacks and Defense
Actor - Professional spies, Governments, Global 25
Target -Technology, critical systems, people with knowledge,
Goal - Compromise tech, people, impact command and control, impact critical infrastructure
Impact - Severe catastrophic losses, National security impact
Tier VI Nations Global 25
Attacks - Full spectrum, High caliber attacks and long term attacks
Defense - Counter intelligence capability, Offensive capability, Risk and vulnerability reduction
Actor - Governments, Global 150, Proxies
Target - Technology, Global 2000 entities, Critical Infrastructure, Large personal data stores
Goal - Gain economic/technology advantage
Impact - Gain defense and commercial capability
Tier V Attackers Nations, Global 150 State Sponsored
Attacks - Unique, multi staged exploits, APTs
Defense - Automated response, Collaborative security and threat intelligence systems, Risk reduction
Actor - Organized crime, Cyber mercenaries
Target -Enterprises, POS systems, identity data, other revenue generating information
Goal - Financial gain, identity compromise
Impact - Financial fraud, identity theft
Tier IV Attackers Organized Crime Groups Cyber Mercenaries
Attacks - Backdoors, Crypto cracking, Advanced malware
Defense - Behavioral and Big Data based APT engines, Community engines, Hardened infrastructure, Consequence management
Actor - Organized crime and hacktivist
Target - Executives, key users, Mid size business
Goal - IP/personal data theft, DDoS
Impact - Loss of IP, Branding
Tier III Attackers Crime Groups, Hactivists
Attacks - Root kits, 0 day exploits, C&C architectures
Defense - SIEM, APT Engines, Mature response
Actor - Coders, Workers
Target - Small business
Goal - Defacement, Revenge
Impact - Denial of service, Data breech
Tier II Attackers Criminals, Disgruntled workers, Programmers
Attacks - Bots, DDOS and other advanced Tier I attacks
Defense - IDS/IPS heuristics, Access controls
Actor - Downloaders
Target - Freemail, web
Goal - Whatever they can do
Impact - Nuisance
Tier I Attackers Script Kiddies, Non-malicious actors
Attacks - Phishing, viruses, DNS attacks
Defense - Endpoint, IDS, IPS, Firewall, AV

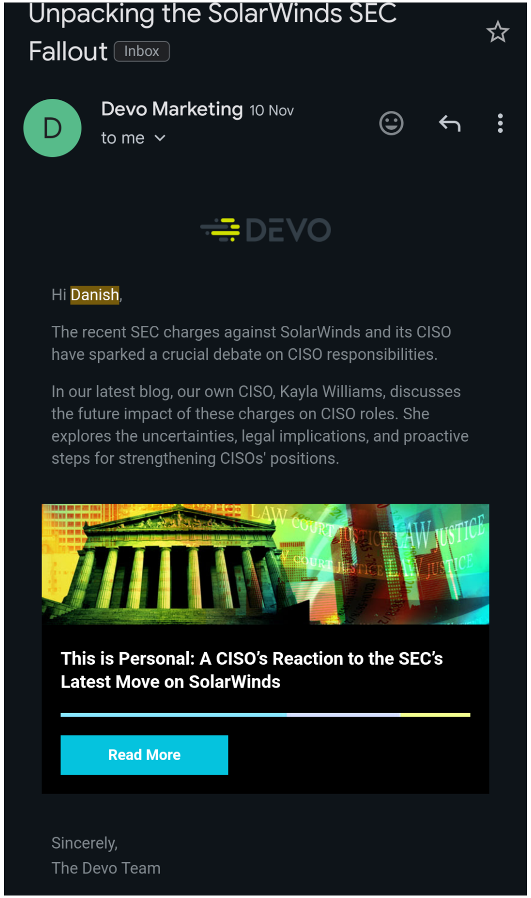
Solarwinds fallout radware webinar and GE Brief XA100



Unpacking the SolarWinds SEC Fallout Inbox

Devo Marketing 10 Nov
to me

DEVO

Hi Danish,

The recent SEC charges against SolarWinds and its CISO have sparked a crucial debate on CISO responsibilities.

In our latest blog, our own CISO, Kayla Williams, discusses the future impact of these charges on CISO roles. She explores the uncertainties, legal implications, and proactive steps for strengthening CISOs' positions.

This is Personal: A CISO's Reaction to the SEC's Latest Move on SolarWinds

Read More

Sincerely,
The Devo Team

GE Brief: XA100

Hi Danish,

Exciting news: The XA100 adaptive engine has achieved a new testing milestone, a key step forward for the world's most advanced fighter jet engine.

"With a third round of testing complete, GE Aerospace has proven again our place as the industry leader in adaptive cycle engines," said GE Aerospace's Defense & Systems President and CEO Amy Gowder.

Read more about this important milestone and the future of XA100.

Dear Danish,

For long time WAF were the signinum to application protection, but the traditional on-prem WAF is no longer enough to protect applications against new threats (like bots, web DDoS), and protect all of their vulnerable surfaces (like API, client side).

In this session we will dive into the various aspects which require organizations to reassess their use of on-prem WAF and what are the best alternatives that will ensure their applications will remain protected.

Hi Danish,

In today's ever-evolving digital landscape, the challenges faced by enterprise data management teams are more complex than ever before. From data security concerns to the rising operational costs and the integration of emerging technologies like AI, managing "big" data has become an intricate task. That's why we are thrilled to introduce our latest resource – "Enterprise Data Management: Big Data," a guide to

DEVO

Hi Danish,

SOC Analyst Appreciation Day (SAAD) 2023 is almost here! This virtual event, on October, 18, recognizes the crucial work of SOC analysts, the unsung heroes guarding organizations against cyber threats.

Join seven sessions throughout the day featuring some of the infosec community's most prolific thought leaders. We'll cover everything from real-life use cases to SOC automation, mental well-being management, and more.

It's time to recognize the true security MVPs. Join us to learn, celebrate, and appreciate SOC professionals! Check out some more session details below.

Navigating Operational Risk with Threat Intelligence

November 21 | 1 PM - 2 PM
Gulf Standard Time (GMT+4)

Register Now →

The threat landscape is shifting, reshaping challenges for security teams. Our attack surface is growing and becoming more complex, attackers are motivated, and security talent is limited.

Navigating these challenges require a different approach. Security teams need an advantage — an advantage that provides the same external view of gaps and weaknesses that an attacker sees and may want to exploit, an advantage to be proactive, and an advantage to stay a step ahead of their adversaries.

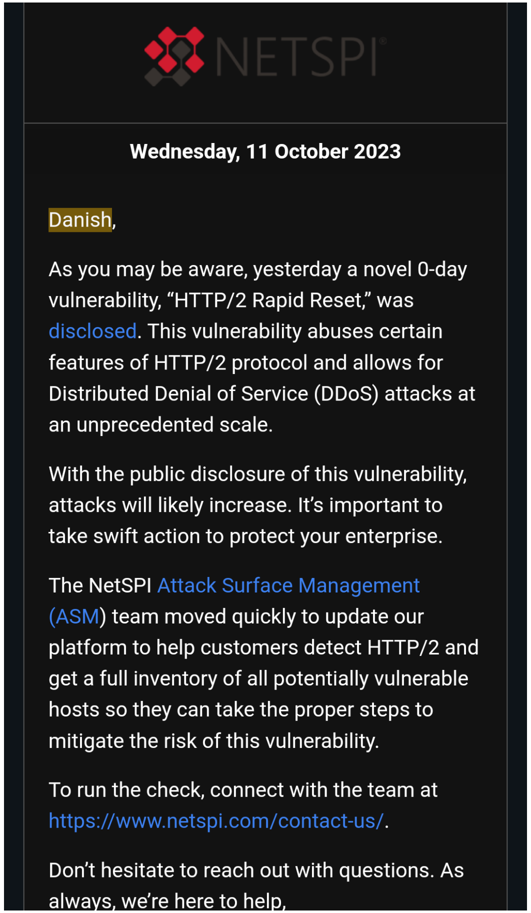
Hi Danish,

Worried about the rising tide of cyber threats infiltrating your network? You're not alone. The ever-evolving digital landscape has made cybersecurity more critical than ever. Traditional defenses just won't cut it anymore.

So, what's content filtering? Think of it as your network's trusty guard. It decides what's cool and what's not. Your network? Well, it's like a nightclub, and content filtering? That's the bouncer who's picky about who gets in and who doesn't.

DDoS MITRE ATT&CK DevOps



NETSPI

Wednesday, 11 October 2023

Danish,

As you may be aware, yesterday a novel 0-day vulnerability, "HTTP/2 Rapid Reset," was disclosed. This vulnerability abuses certain features of HTTP/2 protocol and allows for Distributed Denial of Service (DDoS) attacks at an unprecedented scale.

With the public disclosure of this vulnerability, attacks will likely increase. It's important to take swift action to protect your enterprise.

The NetSPI Attack Surface Management (ASM) team moved quickly to update our platform to help customers detect HTTP/2 and get a full inventory of all potentially vulnerable hosts so they can take the proper steps to mitigate the risk of this vulnerability.

To run the check, connect with the team at https://www.netspi.com/contact-us/.

Don't hesitate to reach out with questions. As always, we're here to help,

Hi Danish,

Struggling to communicate cybersecurity risks to stakeholders? The MITRE ATT&CK framework and the Devo MITRE ATT&CK Adviser app have your back. The Adviser app leverages the MITRE ATT&CK framework to help CISOs summarize, visualize, and articulate complex security jargon in a clear and concise way in order to bridge the gap between technical experts and non-technical stakeholders. That's a win-win for everyone!

How the MITRE ATT&CK Framework Helps CISOs Communicate Risk to Stakeholders

CPE | Adopting the New SEC Cybersecurity Rules for Compliance Resilience Inbox

Kelley Vick 19 Oct
to me

Hi Danish,

I invite you to join us for Adopting the New SEC Cybersecurity Disclosure Rules for Compliance Resilience on Thursday November 2nd at 1pm Eastern.

In this webinar, we will delve into the latest cybersecurity disclosure rules mandated by the U.S. Securities and Exchange Commission (SEC) and explore how organizations can effectively navigate and comply with these regulations set to take effect on December 15, 2023. Attendees will learn about:

- The recently enacted SEC cybersecurity disclosure rules and their implications for publicly traded companies.
- Best practices for aligning cybersecurity policies and practices with regulatory requirements to ensure compliance.
- The core cybersecurity practices necessary to establish a resilient compliance posture.
- Actionable takeaways and a roadmap for implementing robust cybersecurity disclosure practices within their organization.

We will provide **1.5 CPE Credits** and additional resources to attendees on the live program. If you'd like to attend please confirm your position and share with any colleagues who may also be interested, and if you can't

Why Is Threat Intelligence Important? Inbox

Levi Gundert 24 Oct
to me

Danish,

For the last decade Recorded Future has been creating intelligence by collecting, structuring, and analyzing threat data from all over the internet. We empower countries and organizations with the right intelligence at the right time, to improve security and keep infrastructures safe.

The need for actionable and comprehensive threat intelligence has never been greater. Digital environments have become increasingly complex, supply chain ecosystems are full of risk, and automation strategies are failing to keep pace with attackers.

Threat intelligence provides an advantage for defenders to identify and get ahead of risks that matter. Learn more in our blog post covering the

CPE Thursday | How to Prevent, Detect, and Respond to Identity Threats Inbox

Kelley Vick 10 Nov
to me

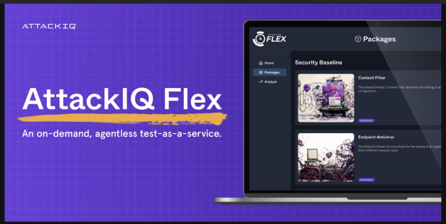
Hi Danish,

I invite you to join us next week for Identity Threat Detection & Response: Mastering the Next Era of Digital Identity Protection on Thursday November 16th at 1pm Eastern.

In today's rapidly evolving IT landscape, identity systems, especially Microsoft Active Directory (AD) used by over 90% of enterprises, are under consistent threat. As such, safeguarding identity systems is no longer an option; it's a necessity. Join us as we uncover the insidious ploys utilized by cybercriminals to exploit identity infrastructure misconfigurations and vulnerabilities. Attendees will gain a comprehensive understanding of:

- Critical ITDR capabilities you need to prevent, detect, respond to, and recover from identity-based threats.
- Why identity-based attacks are one of the top security threats today.
- The stealthy tactics that cybercriminals use to compromise identity systems.
- Building a multi-layered strategy to prevent, detect, and respond to identity-related threats.

We will provide **1.5 CPE Credits** and additional resources to attendees on the live program. If you'd like to attend please confirm your position and share with any colleagues who may also be interested, and if you can't



Hi Danish,

As cyber threats evolve rapidly, network security is more crucial than ever. **AttackIQ introduces Flex packages** to strengthen your organization's security against Command and Control communications and assess your NGFW's effectiveness.

Why Flex Matters:

- PCAP technology tests your security controls without sending malicious traffic.
- Clear guidance for mitigating security gaps.
- Cost-effective risk assessment.

How it Works:

- Assess your NGFW with five key tests
- Cover anti-malware, application filtering, file blocking, intrusion prevention, and URL filtering

AttackIQ's PCAP replay Flex packages not only provide organizations with a comprehensive assessment of their NGFW's security posture but also help identify potential security gaps in C2 communications. Read our blog to learn more!

Origin of Cyberspace & AI

Key Concepts - Evolution of 'Militarised' INTERNET - Origins of Modern Day Cyberspace nd AI . From the Cradle of Army Cyber Networks to Information Superhighway. *How the Military* mpacted and changed the course of modern day Human Civilisation.

ARPANET (Advanced Research Projects Agency Network) - Packet Switched Network.
Developed by - Advanced Research Projects Agency (ARPA) - US DOD.

TCP/IP Protocol Suite - Technical Foundation of the internet. estd - 1969.
Operator - Defense Communications Agency from 1975.
Funding - 1966 onwards ARPA. First Computers Connected in 1969. Network Declared Operational - 1971. Software Development Enabled - Remote Login , File Transfer , Email. DARPA TCP incorporated concepts from French CYCLADES project. Ver 4 of TCP/IP in Jan 1983 - US DOD mandated as standard for all Military Computer Networking. ARPANET decommissioned in 1990 after partnership with Telecom industry and assured private sector expansion and future commercialization of an expanded WWW (World Wide Network) popularly known as the INTERNET.

INSPIRATION (Historical Context) - "LOOK UP" - Distributed Adaptive Message Block Switching , Intergalactic Computer Network , Project Genie , Symposium on Operating System Principles , Interface Message Processors ,

CREATION - 1966 Bob Taylor successfully lobbied ARPA'S Director Charles M Herzfeld to fund Military Network Project. Charles M Herzfeld redirected $1 million from ballistic missile defense program.

ARPA'S Request for Quotation (RFQ) was issued to 140 potential bidders. Most companies regarded ARPAs project as outlandish. Only 12 submitted bids to build a network .ARPA regarded 4 as top rank Defense Contractors. ARPA awarded the contract to 2 contractors. Awarded contract to BOLT , BERANEK AND NEWMAN INc in Jan 1969.

INITIAL 7 Person BBN was aided by technical specificity.

ARPANET was intended to fund advanced research . The ARPANET was a research project that was communications oriented rather than user oriented in design. IN the summer of 1975 , operational control of the ARPANET passed to Defense Communications Agency. The first ARPANET encryption devices were deployed to support classified internet traffic.

The Transatlantic connectivity with NORSAR and UCL later evolved into the SATNET. The ARPANET , SATNET and PRNET were interconnected in 1977.

Ln 1, Col 1 100% Windows (CRLF) UTF-8

Search ENG IN 11:18 24-11-2023

File Edit View

The ARPANET Completion Report in 1981 jointly by BBN and ARPA Concludes,

" it is something fitting to end on the note that the ARPANET program has had a strong and direct feedback into the support and strength of computer science from which the network itself sprang.

Sep 1984 work was completed on restructuring the ARPANET giving US Military sites their own MILITARY NETWORK (MILNET) for unclassified defense department communications..MILNET was a part of Defense Data Network.(DDN).

Decommissioning of the ARPANET on 28 Feb 1990 Vinton Cerf wrote the following lamentation.

Requiem of the ARPANET - "It was the first and being first was best but now we lay it down to ever rest. Now pause with me a moment , shed some tears . For auld lang syne , for love , for years and years of faithful service , duty done , i weep. lay down thy packet now O friend and Sleep.
